

# FACT SHEET

## ONLINE VERIFICATION OF CERTIFICATES

### Summary

The Online Verification system allows owners of AWTA Certificates to verify that the document they possess is legitimate simply by entering the certificate number, security code and an email address into an online form on our website. Documents are then emailed back to the requestor as a secure PDF attachment. Mulesing Status Reports can also be obtained through this facility.

### Service Options:

To access this service, click on the link => <http://www.awtawooltesting.com.au/OnlineVerf.php>

The screen below should appear in the web browser window.

To verify a certificate or request a Mulesing Report, simply update the fields as explained below:

1. Enter the full Certificate number.
2. Choose the type of document (Certificate and/or Mulesing Report).
3. Enter the security code as printed on the bottom of all AWTA certificates.
4. Type the destination email address.
5. Press the [Request Verification] button.

A **green** confirmation message will appear if the request is successful, and a PDF file sent automatically to the nominated email address.

A **red** error message is shown if the verification is unsuccessful.

A **blue** status message is displayed if the certificate requested is no longer current. In cases where the document is not emailed, use the link provided to email AWTA.

This certificate has been reissued as 3-08319782-J6.

Certificate was not sent - Click [here](#) to email AWTA and verify the document

The “Click **here**” link at the bottom will bring up more information about the service from our website. The Online Verification system was introduced to allow AWTA’s customers to confirm that documents they have in their possession are legitimate. In cases where this is cannot be confirmed through online verification they will be directed to contact us and establish they are the bona fide owner. Note that all activity on this web page is logged for security reasons.
